# Introduction

---

PRD is a progressive and delivery-focused consultancy working to transition places to deliver better outcomes for people and the planet. We find innovative ways to solve the challenges our towns and communities face.

Good data and evidence is core to this work. It helps us understand the challenges and opportunities in the places we work and underpins the strategies and advice we provide for clients.

We are looking for a Consultant with strong data analysis skills. The successful candidate will deliver high-quality analysis for our clients, manage our team's array of data tools and resources, and help identify and develop new data sources.

We are open to hearing from candidates from a breadth of professional backgrounds and with a range of specialisms and interests. We want to hear from candidates who are excited by working with data to solve real-world challenges.

## **You'll like this job if...**

- You are excited by working with data to illuminate and solve real-world challenges
- You are interested in learning about different places and communities across the UK
- You want to work on projects that can have a positive impact on people and places
- You want exposure to a range of projects, from economic strategies to night-time economy studies to masterplan delivery programmes to commercial property market reviews
- You appreciate working in small teams with big ideas
- You like sharing what you learn with others
- You are driven to experiment with and explore data

# Salary & benefits

---

- Hybrid working arrangements (currently 3 days in office for 5 day/week staff, 2 days in office for 4 day/week staff). We are based in London but service projects throughout the UK and Ireland. While regular in-person attendance in London is essential, our employees need not be London-based.
- Starting salary from £31,500 to £36,500 depending on experience
- Employer pension contribution of 5% gross salary as part of our workplace pension scheme
- Discretionary bonus based on personal and company performance
- 25 days holiday (in addition to public holidays)
- Enhanced maternity and paternity leave
- Paid sabbatical after long service
- Cycle to work scheme
- Tate membership
- Structured career progression plan and budget for training and professional development
- Ringfenced CSR time

# About the role

---

You will play an integral role managing and supporting the delivery of PRD's work across the public, private and civil society sectors.

You will contribute to our research and strategy projects, being responsible for designing research processes, collecting and analysing data, developing effective data visualisation, sharing findings and implications with clients, and writing reports. You will also support our company-wide Data & Evidence Strategy by helping us identify, test, and access new sources to use in our work and by eventually taking responsibility for the upkeep of and team training on our various data resources.

You will work closely and effectively with PRD colleagues, with opportunities to share your knowledge with the team and support development of teammates. You will also often work with external collaborators, who we partner with to bring a wide set of skills to projects. You will take

responsibility for leading specific tasks or outputs within large-scale projects and for managing smaller-scale projects.

You will work diligently and efficiently, within timescales and budget parameters agreed with each client. There will also be opportunities to contribute to PRD's new business pipeline by helping write bids and proposals.

# Skills & attributes

---

## Essential

- At least one year of professional experience in quantitative data analysis, including finding, cleaning, critically analysing, and presenting insights from data
- Experience with spatial analysis/GIS
- Ability to find connections and insights within data—and to communicate these clearly to non-technical audiences
- Excellent writing skills
- Experience using data sources and repositories relating to UK geographies, economics, demographics, property, etc (e.g. ONS, CoStar, Realyse, London Datastore)
- Inquisitive, methodical and attentive to detail
- An interest in regeneration, cities and the built environment and generally exploring new ways of working in these areas

## Desirable

- Experience with project management (for this role, managing small projects or managing specific tasks/outputs of larger projects)
- Excellent data visualisation skills
- Experience building dashboards in PowerBI
- Knowledge of R or Python
- Experience using APIs

# Behaviours & competencies

---

**Management:** You manage your workload effectively and efficiently—and you identify and communicate potential pinch-points and problems

**Organisation:** You can alternate between different projects and activities while retaining diligence and quality

**Collaborative approach:** You like being part of small teams where you can work with teammates with a broad range of skills and perspectives

**Interpersonal skills:** You can hold engaging discussions with colleagues, partners, and clients, and you can explain complex topics in a clear, engaging way

**Analytical thinking:** You take a logical approach to challenges and can identify key insights from data

**Problem solving:** You take initiative to overcome challenges and develop new ideas to move projects and ideas forward

# About PRD

---

# Background

---

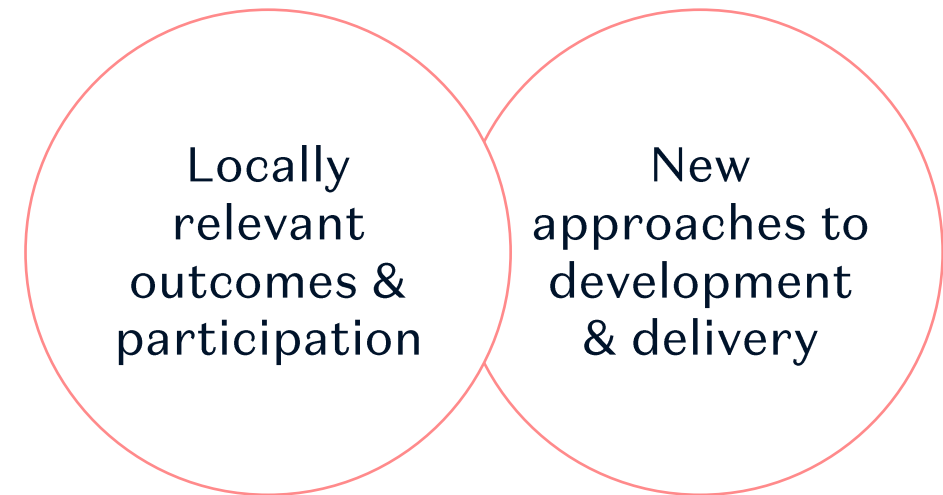

Based just off Union Street in Southwark, London we are a focused team (about 20 of us) of subject area specialists who combine our skills around our shared passion for designing strategies to deliver more inclusive economies, impactful investment, and considered development.

Our core areas of work include social, economic, investment, activation and delivery strategies for places.

We empower our clients to shape and realise their ambitions as well as to measure and demonstrate positive impact.

The team has experience supporting some of the most interesting and challenging areas of the UK to develop holistic, progressive and transformative place and asset strategies.

PRD was founded a decade ago on the belief that there is a 'win-win' way to deliver development for both local communities and developers.

# What we do

---

We do not define our work in terms of specific service areas or thematic topics. As a principle, we are agile and responsive to the needs of each individual client.

Reflecting this, our work covers a broad spectrum of areas. Over the past year this has included:

- Undertaking social and economic research into places, economies and communities
- Developing placed based strategies from individual buildings to town centres to cities and regions
- Making the case for place-based investment, including developing strategic and technical business cases
- Defining and measuring project outcomes and success
- Advising on the development and delivery process, including building new delivery approaches, partnerships and governance mechanisms

Our team members cover a range of specialisms and interests, including:

- Inclusive approaches to addressing inequality and social injustice
- The importance of creative and culture sectors to places and economies
- The transition to net zero, and the role of the circular economy within this
- The role of data and evidence in improving strategic decision making
- Better approaches to engagement and participation
- More progressive approaches to development and property

# Hallmarks of our approach

---

## **We:**

- Are creative and entrepreneurial in the way we approach our work and relationships
- Partner with our clients to deliver the strategies we develop together
- Are values driven in the work we chose to do, how we do it and how we treat each other
- Are committed to creating a positive and supportive work environment where everyone can reach their full potential (including opportunities for training and personal development)
- Are proud of our record of delivering community engagement projects that have enabled local people to shape the places where they live, work and study
- Listen to communities and respond to their ideas, aspirations, and concerns
- Are committed to considering people and planet in everything we do
- Are growing fast, with plenty of exciting projects and opportunities underway and on the horizon
- Come from broad range of technical backgrounds, bringing different perspectives to our work and opportunities for team knowledge sharing

# Project examples

---

# High Streets Data Service

The GLA's high streets data service provides footfall, spending, vacancy, and amenities data for 600+ high streets and 300+ town centres in London. The data is intended to help local authorities understand how high street activity is changing. PRD has supported the GLA with research and analysis using this data.

For example, we used cluster analysis on the trendlines of hundreds of high streets to identify different spending patterns in reaction to Covid-19; we used shop type data to understand the strength of the 'foundational' economy across high streets; and we assessed whether tree cover correlates to footfall resilience on extremely hot days.

We have also used the data to explore trends in specific local authorities and town centres across London, including differences in daytime and evening activity, changes in response to events, and differences in footfall throughout town centre character areas.

Is Thursday the new Friday in Central London?

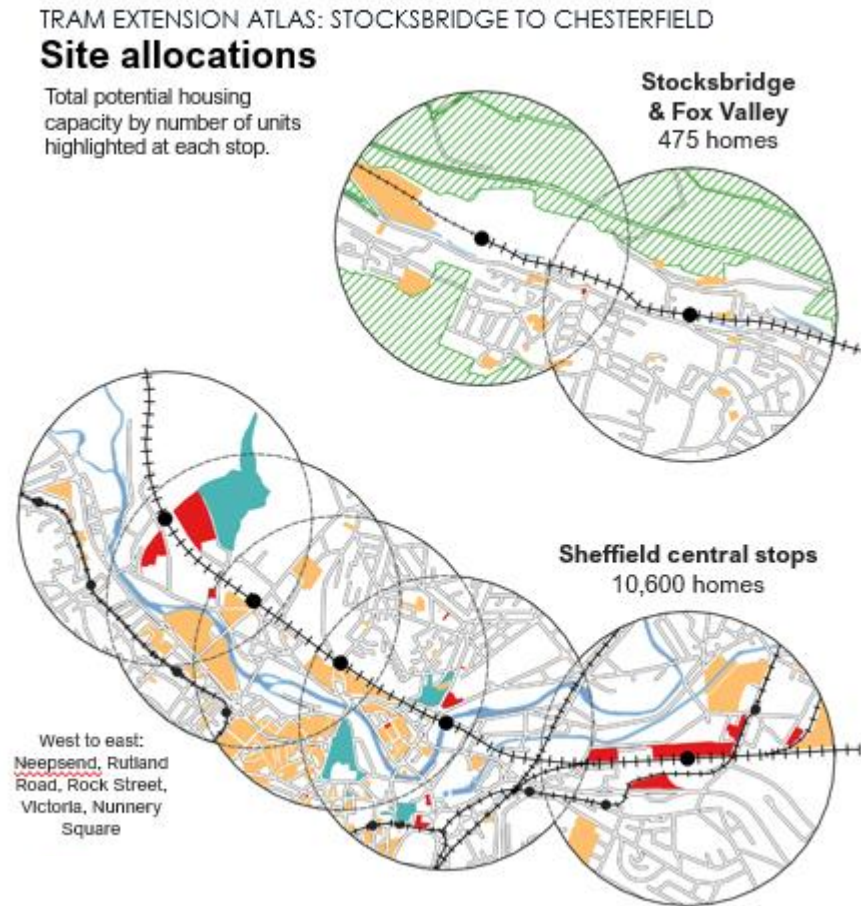

Data anonymised & aggregated by BT Mobility via GLA High Streets Data Service

# Sheffield tram extensions

Sheffield City Council commissioned PRD to assess social and economic benefits of proposed extensions to its Supertram network for the city centre and city-region. We started by developing a tram extension atlas which reviewed data relating to the communities and land uses falling within an 800m radius of each proposed stop.

Data included house sale and rent prices, employment and income deprivation, risk of food poverty, land use, site allocations, local amenities, population density, and population characteristics.

Our analysis estimated that the tram extensions, taken together, could spur 22,000 homes—almost 2/3 of Sheffield's housing target—71 hectares of employment space for 22,000 jobs, around 100,000 additional residents having access to Sheffield's Supertram network, and £171m in council tax and business rates revenue.

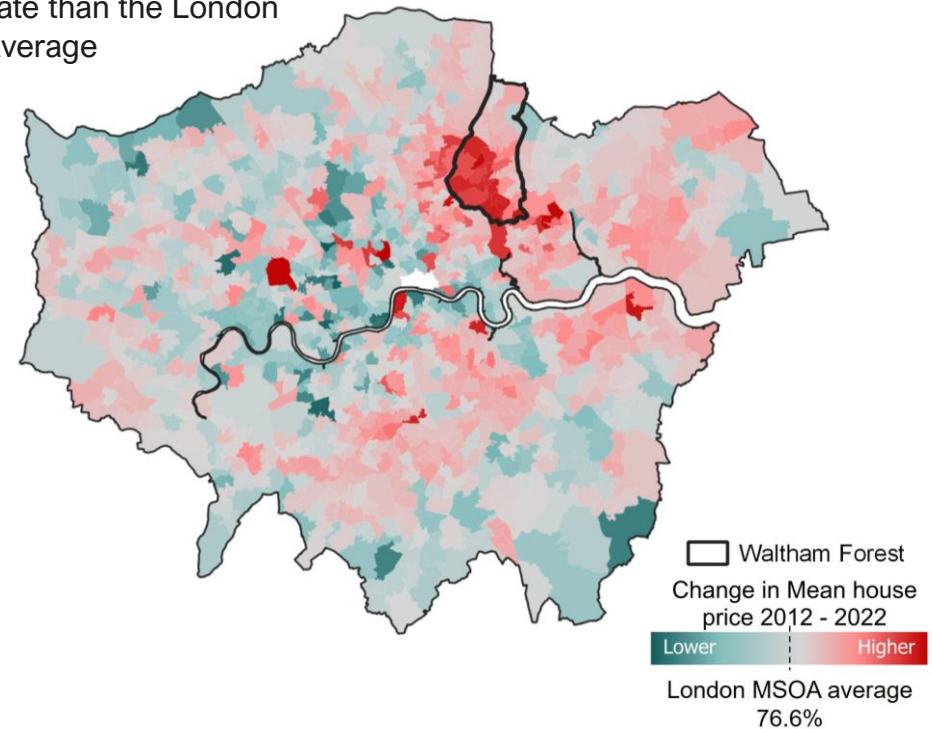

# Waltham Forest Housing Commission

---

Waltham Forest is one of the most rapidly changing boroughs in London, having the fastest house price growth since 2012. Using the London Planning Datahub and Census, PRD identified the neighbourhoods with the highest housing development over the last ten years and showed how development corresponds to changing demographics. This provided deep insight into who had moved into new homes and the role that tenure (affordable vs market housing) played in these changes.

We supplemented this with a programme of in-depth engagement through focus groups in the areas that had seen the highest development, which helped to test the quantitative data and understand how local people were experiencing area change. Marrying good data with rich qualitative evidence provided a deep understanding of the role of development in the borough's growth story over the last ten years combined with communities' experience of rapid change.

House prices in Waltham Forest increased at a higher rate than the London average

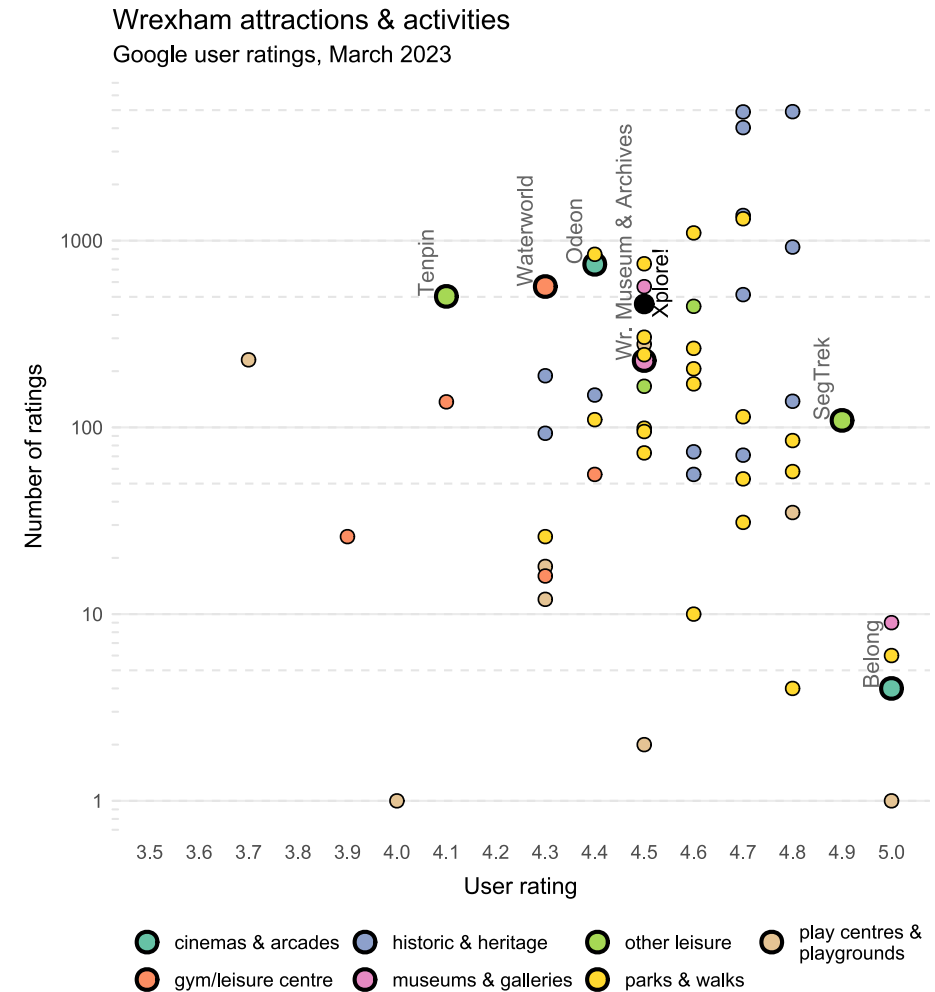

# Xplore! Science Centre evolution

PRD worked with Xplore! Science Centre in Wrexham to understand Xplore's market position against other attractions in the region and opportunities for bringing new uses and amenities to its spare floorspace.

We used Google Places API to extract ratings information on attractions throughout Wrexham to compare Xplore against its neighbours and main competitors. We also mapped visitor origins to identify Xplore's core and secondary catchments as well as the extent of its engagement with schools throughout the region.

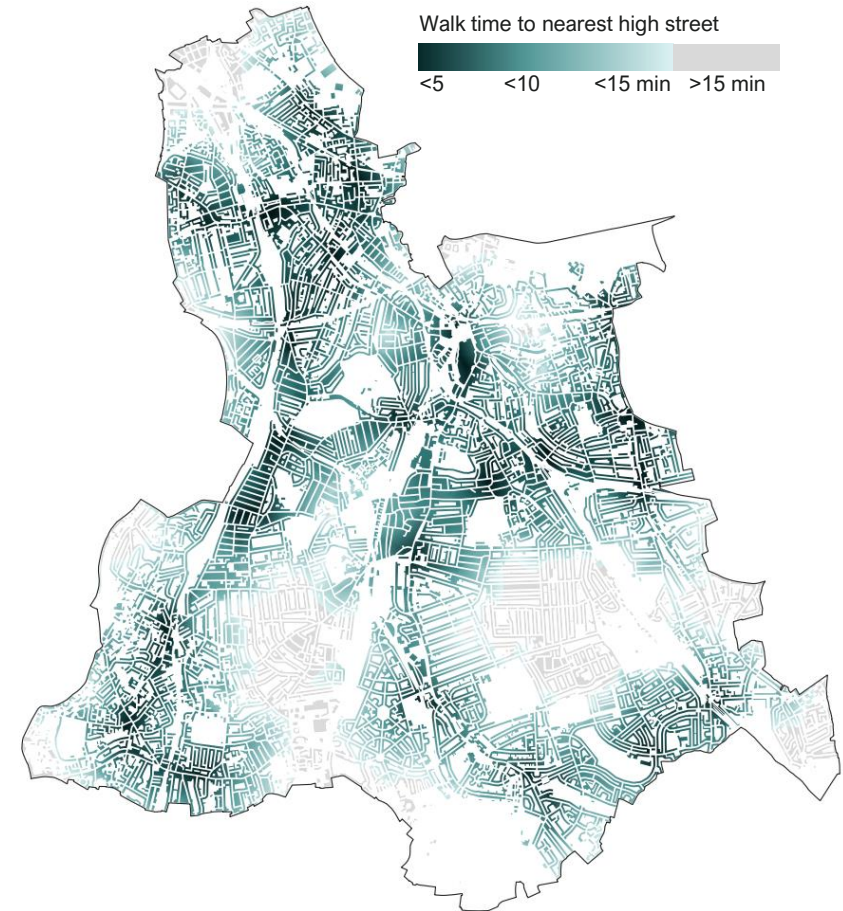

# Lewisham inclusive economy strategy

---

We undertook a detailed study of Lewisham's economy to inform a new inclusive economy strategy for the borough. Our study used traditional economic data, such as job counts and labour market indicators, alongside data such as pay, job security, access to town centres, deprivation, risk of food insecurity to better understand how residents and workers themselves experience the economy. We also reviewed data on energy performance of commercial properties to assess the scale of building stock improvement required to keep employment spaces operational in the future.

Based on the evidence and discussions with council officers, we then developed a strategy and action plan based on four pillars: enterprise and creativity, opportunities for young people, decarbonisation, and prosperity.

## PART 1

Send the following items to [careers@prdemail.co.uk](mailto:careers@prdemail.co.uk) with DATA CONSULTANT in the subject line by 9 am on Monday 29 July 2024.

1. Your CV. You *do not* need to supply a cover letter.
2. Responses to the following questions:
  - Tell us about a project in which you used quantitative evidence. What questions were you trying to answer or what problems were you trying to solve? What sources and data did you use and how did you go about your analysis? (max 300 words)
  - Tell us about a time when you took initiative to solve a problem or develop a new idea. What problem did you hope to solve and how did your idea help? (max 300 words)

## PART 2

Complete the Equalities Monitoring Form. This form will be separated from the rest of your job application upon receipt and will not be considered as part of the short-listing or appointment process—the Equalities Monitoring Form is processed by a different team member to those who review your CV and question replies.

**Your application will not be considered complete unless this form has been submitted.** If you do not wish to provide some/any of this information, there is an option within the form to select 'Prefer not to say'.

## Notes & contact

---

We are committed to being an inclusive employer and we welcome applications from everyone regardless of age, gender, ethnicity, sexual orientation, class, faith or disability. If you have accessibility needs, please get in touch and let us know any requirements you may have. We are more than happy to make reasonable adjustments.

**You must have the right to work in the UK.**

If you have any questions about the role or recruitment process, please contact Amanda Robinson, [amanda.robinson@prdemail.co.uk](mailto:amanda.robinson@prdemail.co.uk).

Direct applications only please, no recruiters.
